

# Hypnoke Wireless Corporate

## Group Communication System

Introducing the Hypnoke Wireless Corporate Group Communication System enabling you to communicate with groups of up to 30 people in a controlled, silent environment, dramatically increasing concentration levels of what is being said.

### Hypnoke Corporate offers the following benefits to the therapist:

- \*Portable, quick and easy to set up. Crystal clear sound.
- \*Perfect for non-technical people to operate
- \*No wires between trainer and clients
- \*Instantly increases your professional image and client confidence
- \*Creates an intimate 'one to one' environment with any group
- \*Operating distance up to 60m

Hypnoke Corporate is a unique system with superb sound quality that will transform any group session into a memorable client experience.

The kit comprises of two cases; one for the headsets and one for battery charging the transmitter and receivers. These cases will charge up to 12 or 30 receivers simultaneously and work anywhere in the world.

The supplied rechargeable batteries last up to 12 hours and can be recharged up to 500 times. Each client can adjust the headset volume to their personal preference.

Our Digital Recording Systems can also be linked to the system for simultaneous recording of what is being said.
